OBJECTIVE	CALORIES	PROTEIN	CARBOHYDRATES	FAT
Fat loss	~1,515-1,595 kcal	~95-135g	~160-210g	~30-50g

How to use this plan: No breakfast slot, your first food of the day is lunch, the way you already run your mornings. Your coffee is counted, 1 pod in the morning and 1 after lunch, no later than 2pm. Pick 1 option from lunch, dinner and dessert every day, the snack is daily, any combination lands on your targets. Meals are spread through the day from lunch on, no giant meals, no starving windows.

How to weigh: Weigh everything raw, before it hits the pan. Meat raw, pasta and oats dry, potatoes and vegetables raw, frozen food straight from the bag. Ready-to-eat items get weighed as they come, microwave rice straight from the pouch, tins drained first. Anything in a labelled single serve (pots, pouches, bars) needs no scales at all. Fresh fruit, salad and vegetables never need the scales, pieces and handfuls do the job. Spoon measures are level, not heaped. Batch cooking? Weigh the full amount raw, cook it, then weigh the cooked total and split it evenly into your portions.

COACH NOTES

- The snack is not locked to the afternoon. If a morning ever feels long on coffee alone, have it early, it is the same food either way.
- Weekend drinks: vodka, soda and fresh lime only, about 65 calories a glass, 3 to 5 max across the night and closer to 3 keeps the week tight. On drink nights the drinks take dessert's place.
- Steps are your daily job while training is limited: log yesterday's total every morning on your page.
- Sauna days drop the next morning's scale weight through water, it comes back when you rehydrate, the weekly average does not care, so neither do we.
- Mince batch: cook 300g raw mince plain on taco night, weigh the cooked total and split it evenly, season tonight's half in the pan, the plain half is tomorrow's lunch bowl.
- If you are genuinely hungry between meals all week, tell me, the plan gets adjusted, that is my job.

DAILY TARGETS
