How to use this plan: Pick 1 option from each slot every day: breakfast, lunch, snack, dinner and dessert. Any combination lands you on your targets, the thinking is already done. Your morning coffee is counted and runs as normal. Meals are spread evenly through the day, no giant meals, no starving windows. Weekends have their own drinks rule, it is in the coach notes below.

How to weigh: Weigh everything raw, before it hits the pan. Meat raw, pasta and oats dry, potatoes and vegetables raw, frozen food straight from the bag. Ready-to-eat items get weighed as they come, microwave rice straight from the pouch, tins drained first. Anything in a labelled single serve (pots, pouches, bars) needs no scales at all. Fresh fruit, salad and vegetables never need the scales, pieces and handfuls do the job. Spoon measures are level, not heaped. Batch cooking? Weigh the full amount raw, cook it, then weigh the cooked total and split it evenly into your portions.

COACH NOTES

Your coffee is counted: 2 espresso pods with caramel syrup and a splash of milk, about 80 calories, enjoy it exactly as you already do. Weekend drinks: vodka, soda and fresh lime only, about 65 calories a glass, 3 to 5 max across the night and closer to 3 keeps the week tight. On drink nights the drinks take dessert's place. Steps are your daily job while training is limited: log yesterday's total every morning on your page, week one sets your baseline and then we set your target together. Sauna days drop the next morning's scale weight through water, it comes back when you rehydrate, the weekly average does not care, so neither do we. If you are genuinely hungry between meals all week, tell me, the plan gets adjusted, that is my job. Mince batch: cook 250g raw mince for dinner, weigh the cooked total, split it evenly, half is tonight's bowl, half is tomorrow's lunch bowl.
