CLIENT GOALS

GOAL	CALORIES	PROTEIN	CARBOHYDRATES	FAT
Lean muscle gain	~2,645-2,845 kcal	~180-205g	~195-300g	~75-115g

How to use this plan: Three meals, no snacks, the way you asked: breakfast, lunch and dinner, dinner the biggest. Pick 1 option per meal, any combination lands on your targets. Lunch cooks once for you and Dolly, your plate weighed to your card. Dinners are yours, built around what you asked for.

How to weigh: Weigh everything raw, before it hits the pan. Meat raw, pasta and oats dry, potatoes and vegetables raw, frozen food straight from the bag. Ready-to-eat items get weighed as they come, microwave rice straight from the pouch, tins drained first. Anything in a labelled single serve (pots, pouches, bars) needs no scales at all. Fresh fruit, salad and vegetables never need the scales, pieces and handfuls do the job. Spoon measures are level, not heaped. Batch cooking? Weigh the full amount raw, cook it, then weigh the cooked total and split it evenly into your portions.

COACH NOTES

- The holding phase is done, this block we build. You are in a small surplus on purpose, so the scale drifting up slowly is the plan working, not a problem. About a quarter of a kilo a month is the pace we want, any faster and we pull it back.
- Training days only: 2 LCM Kaleidos bars alongside your lunch, 30 to 45 minutes before your session. Rest days skip them, nothing else changes.
- More carbohydrates before training can nudge the scale a few hundred grams for a couple of days. Water, not fat.
- Creatine: 10g every day, any time, no days off.
- Lunch lands about 30 minutes before your afternoon session. That is your pre training meal.
- Pepsi Max and your sugar free energy drinks stay free, 1 to 2 a day.
- Weekend drinks: spirits with sugar free mixers, cap it at 4 to 5. A big night on top of a surplus gets stored while the alcohol is in your system, so every big one slows the build.
- No meat and rice plates anywhere. The only rice on the plan is inside your burrito.
- 13,000 steps a day, same number as Dolly. Steady beats 27k one day and 3k the next.
- Weigh in and steps form every night, back to back.
